

Mini-Posts, Post Holders and Bases

Mini-Posts

Mini-posts are 6mm diameter posts of stainless steel with an M4 male thread on one end and a small tightening hole near the threaded end. A range of lengths from 15 to 50mm is offered. They can be mounted onto the mini-carriers or directly onto the mini-baseplates by means of mini-post holders. The mini-post holders also have an M4 thread on one end and are supplied with a matching collar for ease of height maintenance. Mini-post holder lengths range from 15 to 40mm.

Product No.	Dimension (mm) L
155-0330	10
155-0340	15
155-0350	20
155-0360	25
155-0370	30
155-0380	40
155-0390	50

MINI-POST

Product No.	Dimensions (mm) a	L
155-0440	12	15
155-0450	17	20
155-0460	22	25
155-0470	27	30
155-0480	32	35
155-0490	37	40

MINI-POST HOLDER

Mini-post bases are thin plates of aluminum which have an M4 threaded hole for the mounting of a mini-post or mini-post holder. They also have slots or clearance holes for mounting onto a mini-baseplate. Three types are offered: a simple base with slotted holes either side, an adjustable base with a single 15mm long slot, and a large base which will accept either a mini-post or a mini-stage. The bases are 5mm thick. See drawings on opposite page.

A tool kit and selection of screws and washers for the mini-system is listed on page 308.

The combination of wrenches and screwdrivers will provide you with all of

the necessary tools for the complete mini-system in one convenient container.

And the extra screws and washers will be found useful for replacing those small items which seem to be inexplicably lost.
